

TELECO's
embedded
voice processing
solution for the
Toshiba Strata®
CIX Series.

**Tightly Integrated
Communications
Solution**

Octet is a reliable, automated attendant/voice mail system designed to reside within the Toshiba Strata CIX® telephone systems exclusively.

BENEFITS	FEATURES
HAVE YOUR VOICE MAIL MESSAGES SENT TO YOUR EMAIL AUTOMATICALLY	Octet can automatically forward a copy of your voice mail message to your email for immediate playback and/or forwarding of your voice mail to another persons email.
SAVE SPACE AND MONEY	This internal circuit card slides directly into an available slot on your Toshiba Strata® CIX telephone system. Octet has no external parts and eliminates the need for additional station cards.
PLAY MUSIC OR MESSAGES ON HOLD OR BACKGROUND MUSIC WITHOUT THE NEED FOR EXTERNAL MUSIC SOURCES	Octet has two audio ports to play music/ messages on hold to your callers or background music.
PLACE CALLERS IN QUEUE	With advanced call queuing, Octet can quickly and efficiently place callers on hold and keep them updated with their place in queue. Callers may automatically be placed on hold or given the option to hold.
OFFERS ABILITY TO CUSTOMIZE FEATURES	Allows administrator to customize options per user, depending on user needs.
GIVE OUT ONLY ONE NUMBER FOR PHONE AND FAX	Fax detection capabilities save you the expense of separate numbers or additional trunk lines by automatically routing fax calls to your fax machine.
RECEIVE INSTANT NOTIFICATION OF NEW MESSAGES	Octet will alert you of new messages via your cell phone, home phone, pager, or even email, enabling mobile users to respond to messages instantly.
CREATE CUSTOM GREETINGS OR MESSAGES ON HOLD	Greetings and/or messages on hold may be automatically changed at scheduled times on any day of the week.
SUPPORT MULTIPLE COMPANIES WITH THE SAME SYSTEM	Each company can have customized greetings, business hours, holidays, and operators.
END MISCOMMUNICATION WITH CALL RECORD CAPABILITIES	Users can record a conversation starting at any time during the call, then immediately send the recorded conversation to any mailbox in the system, or save it to their own. With email forwarding, the user may store and/or forward recorded conversations.
LISTEN AS CALLERS ARE LEAVING YOU A MESSAGE	Users can listen to callers as they are leaving a voice mail message using call monitor.

PERFECT VOICE OCTET™

FEATURES

Integration

- Flexible Integration with Toshiba CIX® Series 4.2 and higher
- Direct Backplane SMDI Integration
- Connects directly to Backplane
